

LA area data profile: Older people's pathway

East Riding of Yorkshire

Date produced: 18 July 2019

Contact: arealevelanalytics@cqc.org.uk

Context and demographics

Context

This data profile uses analysis to help identify issues within health and care systems in local authority areas. It is focused on care for older people (aged 65+), however some indicators are for the whole adult population. Full information about the analysis can be found in the technical [Link to technical appendix](#)

Demographic map- Age

Demographic map- Deprivation

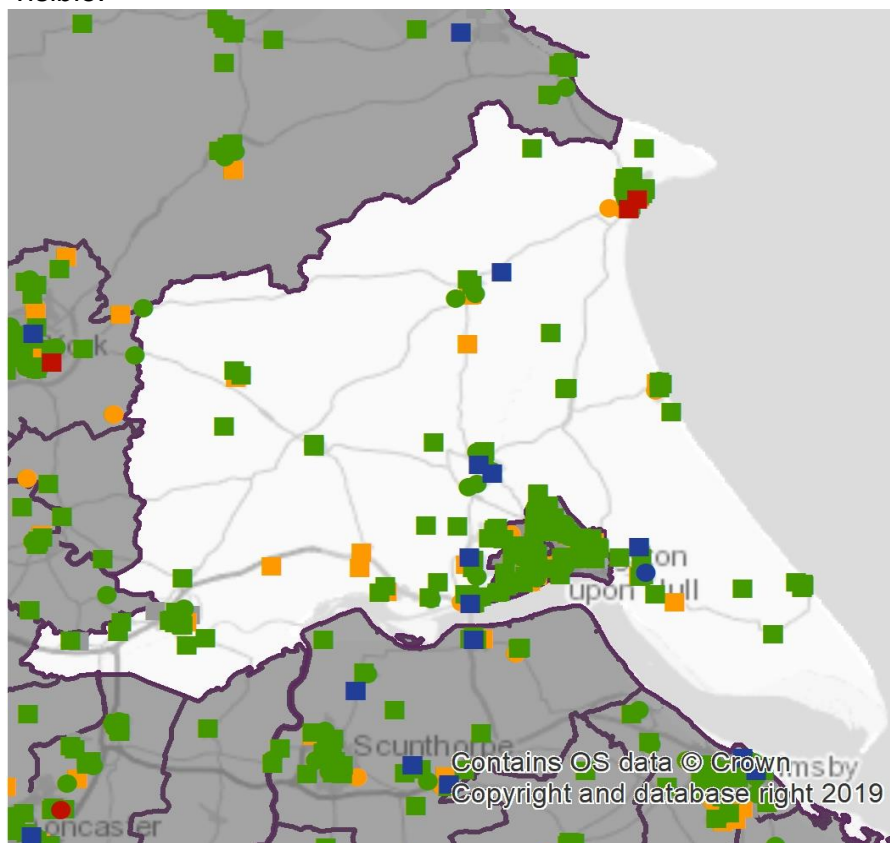

Demographic map- Ethnicity

Ratings – adult social care

This map shows the overall ratings of active adult social care locations in East Riding of Yorkshire. There may be multiple locations in one position so not all locations may be visible.

Nursing homes - see circles on map

| | Inadequate | R.I.* | Good | Outstanding | Unrated |
|-------------|------------|---------|----------|-------------|---------|
| This LA | 0% (0) | 21% (4) | 74% (14) | 5% (1) | 0% (0) |
| Comparators | 2% | 22% | 69% | 3% | 4% |
| England | 2% | 21% | 68% | 4% | 4% |

Residential care homes - see squares on map

| | Inadequate | R.I.* | Good | Outstanding | Unrated |
|-------------|------------|----------|----------|-------------|---------|
| This LA | 2% (2) | 16% (19) | 75% (92) | 5% (6) | 2% (3) |
| Comparators | 1% | 14% | 77% | 3% | 4% |
| England | 1% | 13% | 79% | 3% | 4% |

Domiciliary care agencies - not shown on map

| | Inadequate | R.I.* | Good | Outstanding | Unrated |
|-------------|------------|--------|----------|-------------|---------|
| This LA | 2% (1) | 7% (3) | 68% (28) | 0% (0) | 22% (9) |
| Comparators | 1% | 9% | 70% | 5% | 16% |
| England | 1% | 10% | 65% | 3% | 21% |

Community care services - not shown on map

| | Inadequate | R.I.* | Good | Outstanding | Unrated |
|-------------|------------|--------|---------|-------------|---------|
| This LA | 0% (0) | 0% (0) | 80% (4) | 20% (1) | 0% (0) |
| Comparators | 0% | 9% | 67% | 0% | 24% |
| England | 0% | 5% | 69% | 4% | 22% |

*R.I. = requires improvement

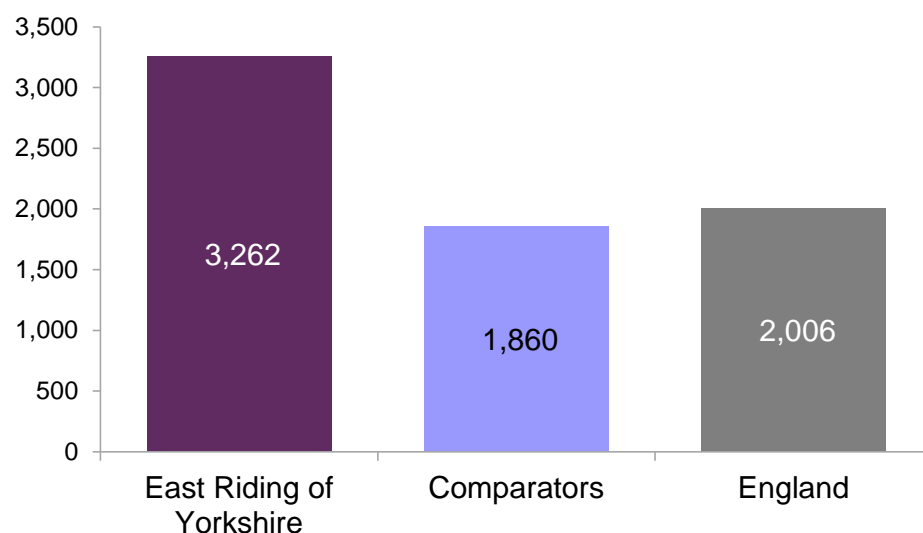

Numbers in brackets are the number of locations.

CQC data accessed on 18/07/19.

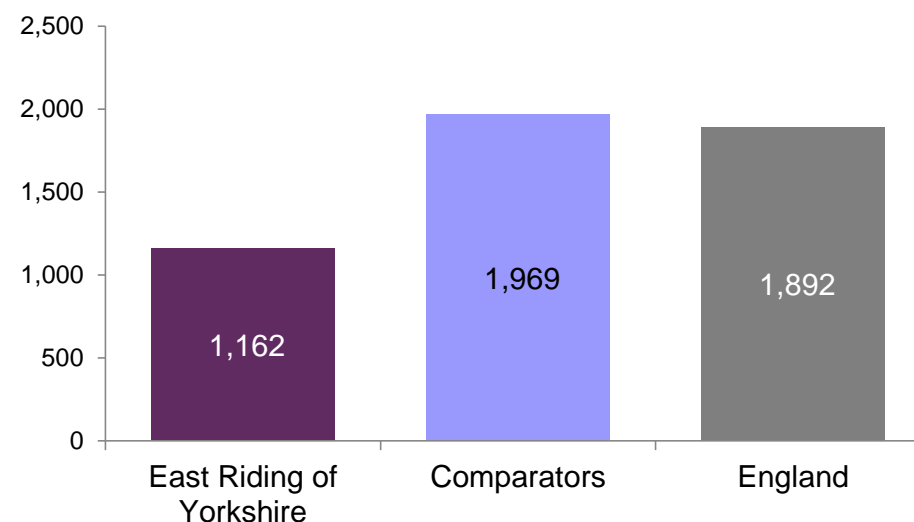

Service provision – adult social care service provision

Residential care beds per LA population (65+)

Nursing care beds per LA population (65+)

This slide shows the number of residential and nursing care home beds for the population of East Riding of Yorkshire LA as at 18/07/19. The comparator group and England bars represent the number of care home beds available across those areas if their older populations were scaled to the same size as East Riding of Yorkshire's older population. Population figures are ONS mid year estimates published for 2017.

Service provision – change in care bed numbers

This slide shows change in residential and nursing care home beds per population aged 65+ between each iteration of this profile. The data points shown in the charts below correspond with the dates previous area profiles were produced and are also marked along the bottom of the charts.

Weighted provision of residential home beds over time

Change in residential home beds between the profile published in December 2017 and this current profile:

| | |
|--------------------------|-------|
| East Riding of Yorkshire | +1.9% |
| Comparators | -1.3% |
| England | -0.9% |

Weighted provision of nursing home beds over time

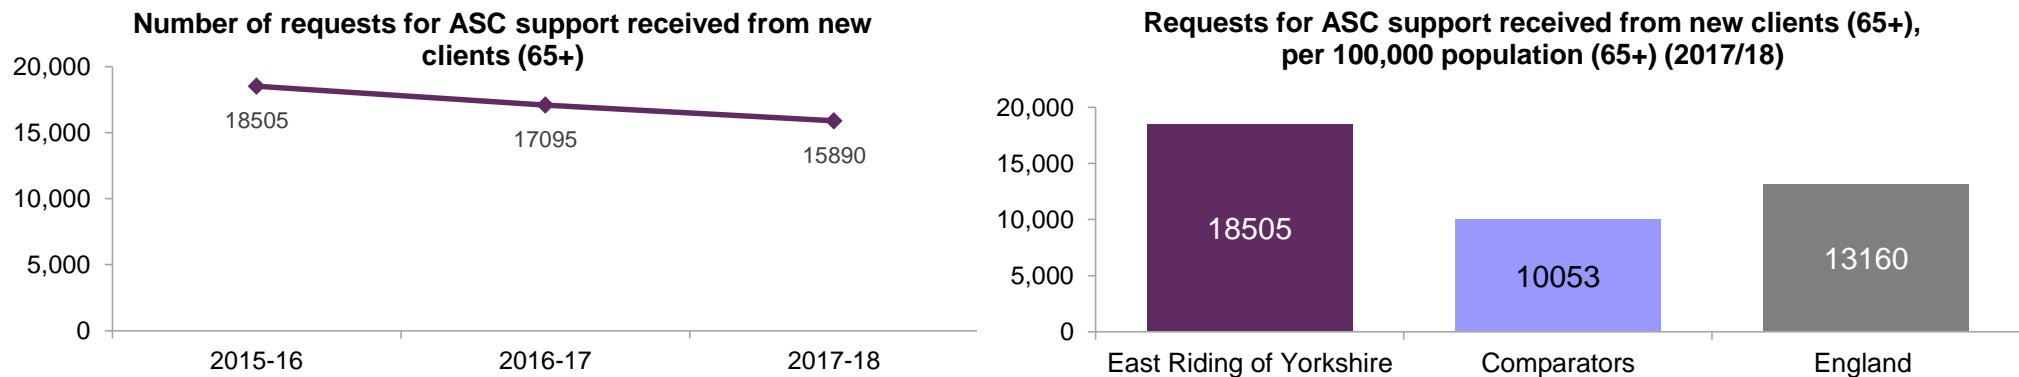

Change in nursing home beds between the profile published in December 2017 and this current profile:

| | |
|--------------------------|--------|
| East Riding of Yorkshire | -10.9% |
| Comparators | -4.1% |
| England | -0.1% |

Service provision – requests for ASC support

This slide shows the number of requests for adult social care support from new clients aged 65+ received by the selected local authority over the last 3 years and the rate of requests per 100,000 population in 2017/18 in the selected local authority compared to the average across comparator areas and England. This data was taken from the Adult Social Care Activity and Finance Report.

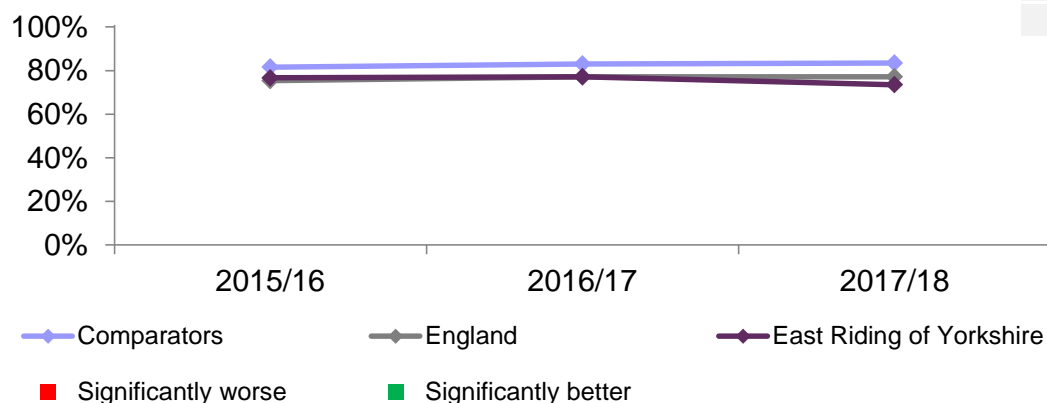

Services received by new clients (65+) requesting ASC support in 2017/18

Service provision – short-term treatment outcomes and long-term care home admissions

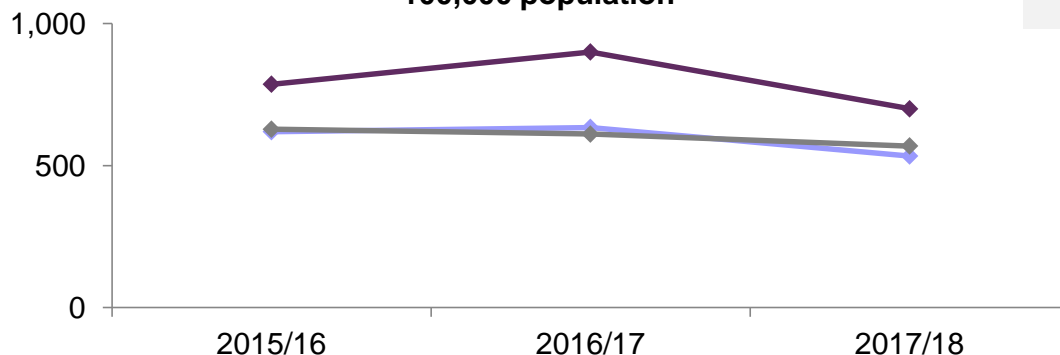

Proportion of new service users (65+) who received a short term service to maximise independence who then required no ongoing support or support of a lower level

| | 15/16 | 16/17 | 17/18 |
|---------------------------------|------------|------------|------------|
| East Riding of Yorkshire | 77% | 77% | 73% |
| Comparators | 82% | 83% | 83% |
| England | 75% | 77% | 77% |

This chart and table shows the proportion of older people (65+) who requested adult social care support from their local authority as a new service user and received a short term service to maximise their independence and who then went on to require no further ongoing support or support at a lower level. This data is taken from the Adult Social Care Outcomes Framework (ASCOF).

Long-term support needs of older adults (65+) met by admission to residential and nursing care homes, per 100,000 population

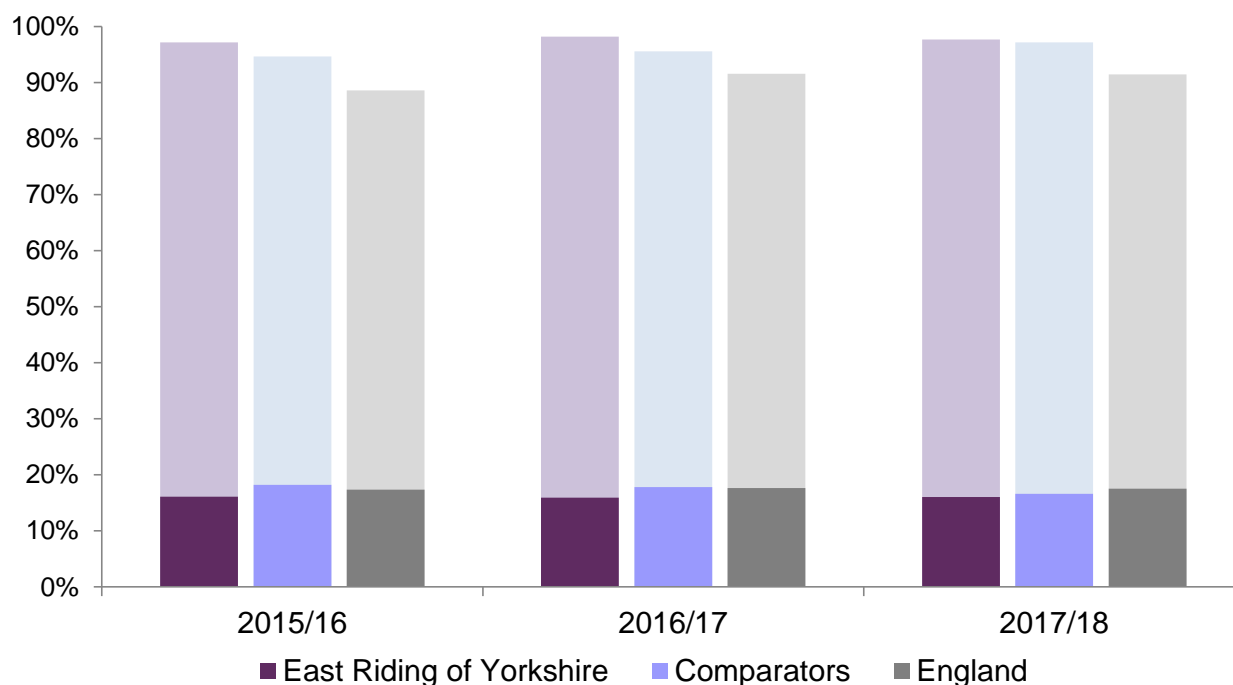

| | 15/16 | 16/17 | 17/18 |
|---------------------------------|------------|------------|------------|
| East Riding of Yorkshire | 786 | 899 | 700 |
| Comparators | 619 | 634 | 533 |
| England | 628 | 611 | 568 |

This chart and table shows the rate of council-supported older people (65+) whose long-term support needs were met by a change of setting to residential or nursing care during the year per 100,000 population. This data is taken from the Adult Social Care Outcomes Framework (ASCOF).

Service provision – self directed support and direct payments for ASC

Percentage of ASC service users (65+) who receive a direct payment
(Plus percentage receiving any other self-directed support)

Percentage of ASC service users aged 65+ who received any self-directed support (including direct payments)

| | 15/16 | 16/17 | 17/18 |
|---------------------------------|--------------|--------------|--------------|
| East Riding of Yorkshire | 97.2% | 98.2% | 97.6% |
| Comparators | 94.7% | 95.6% | 97.2% |
| England | 88.6% | 91.6% | 91.4% |

Percentage of ASC service users aged 65+ who received direct payments

| | 15/16 | 16/17 | 17/18 |
|---------------------------------|--------------|--------------|--------------|
| East Riding of Yorkshire | 16.1% | 15.9% | 16.1% |
| Comparators | 18.2% | 17.8% | 16.6% |
| England | 17.3% | 17.6% | 17.5% |

The bold-coloured bars on the chart show the percentage of people aged 65+ who were accessing long-term adult social care support at the end of March of each year who were receiving direct payments. The lighter shaded area of each bar represents the percentage who have a council-managed Personal Budget in place (another kind of self-directed support).

Staffing – adult social care turnover and vacancy

| Area | Turnover rates | | |
|--------------------------|----------------|-------|-------|
| | 15/16 | 16/17 | 17/18 |
| East Riding of Yorkshire | 34.9% | 34.0% | 34.8% |
| Comparators | 30.8% | 30.2% | 32.6% |
| England | 27.4% | 27.7% | 30.7% |

| Area | Vacancy rates | | |
|--------------------------|---------------|-------|-------|
| | 15/16 | 16/17 | 17/18 |
| East Riding of Yorkshire | 5.8% | 2.3% | 5.2% |
| Comparators | 6.4% | 6.9% | 7.7% |
| England | 7.0% | 6.7% | 8.0% |

ASC staff turnover rates 2015 - 2018

ASC staff vacancy rates 2015 - 2018

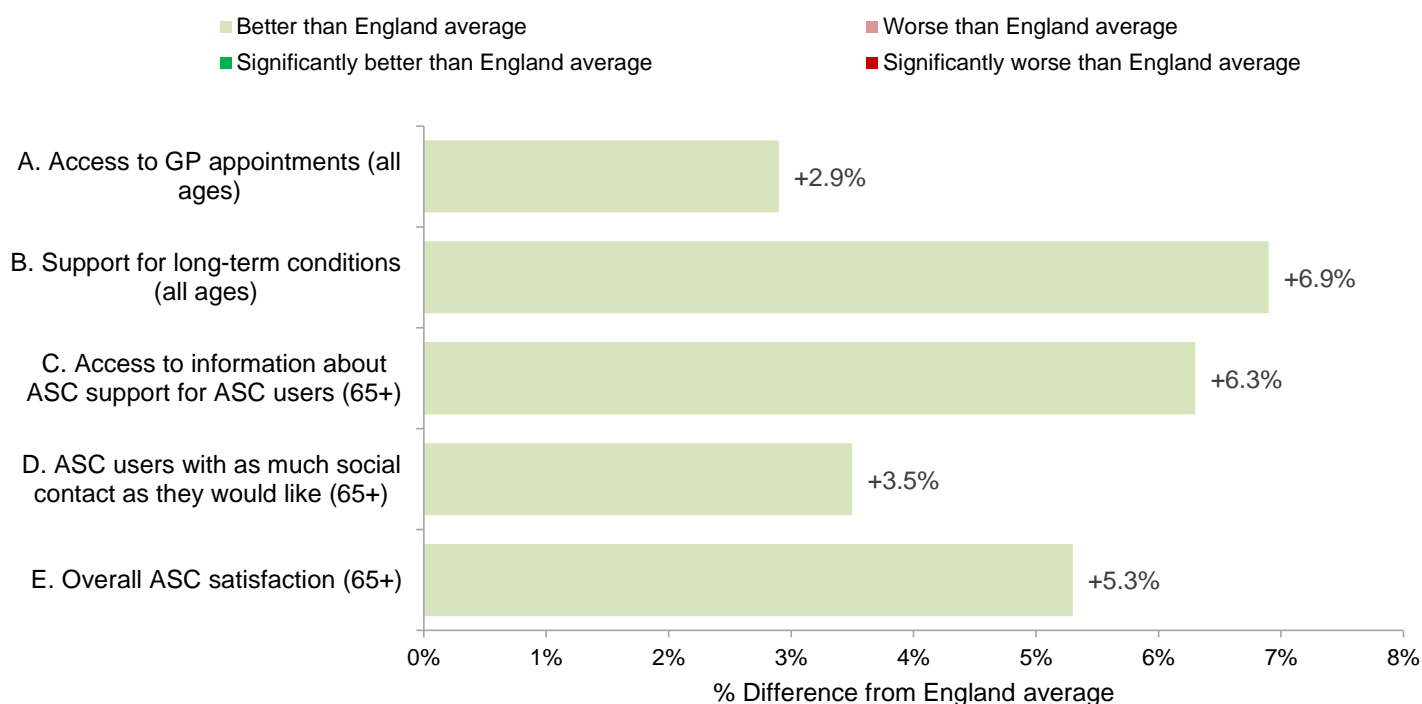

◆ Comparators ◆ England ◆ East Riding of Yorkshire ◆ Comparators ◆ England ◆ East Riding of Yorkshire
■ Significantly better ■ Significantly worse ■ Significantly better ■ Significantly worse

This slide provides information on estimated levels of staff turnover and vacancies within adult social care services in recent years. These estimates are developed by the Workforce Intelligence team at Skills for Care using data supplied by adult social care organisations. Data may be subject to data quality and completeness issues. Data supplied directly to CQC by Skills for Care in July 2018.

Service user experience measures

Performance of East Riding of Yorkshire compared to the England average on selected 2017/18 patient experience measures

| Measure | East Riding of Yorkshire | England |
|---------|--------------------------|---------|
| A | 71.6% | 68.7% |
| B | 66.5% | 59.6% |
| C | 81.3% | 75.0% |
| D | 47.5% | 44.0% |
| E | 68.2% | 62.9% |

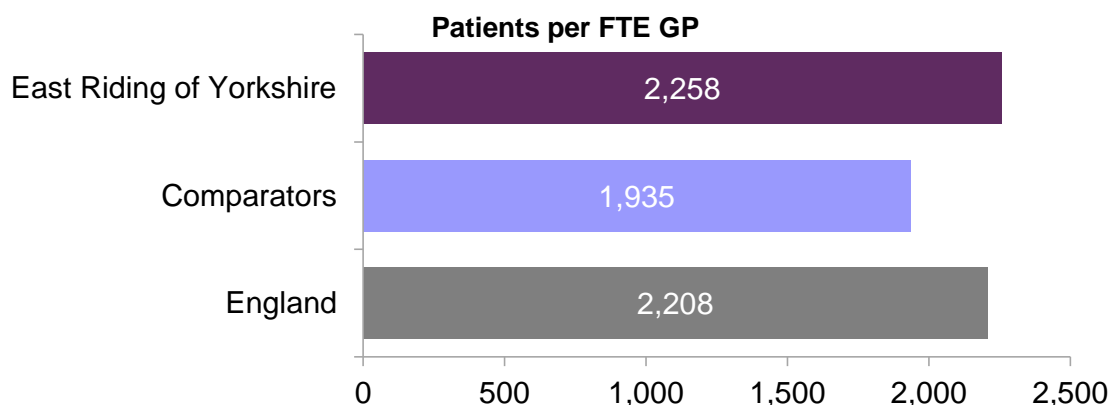

The chart above shows the performance of East Riding of Yorkshire compared to the England average for selected service user experience measures. Measures where East Riding of Yorkshire is performing better than the England average are in green and measures where it is performing worse than the England average are in red. Bolder colours mean performance is significantly better or worse. The actual values for each measure are detailed in the table on the right. Details of the source and time period of each measure is detailed in the technical appendix.

Service provision – GP ratings, extended access and workforce

| | GP ratings as at 18/07/19 | | | | |
|-------------|---------------------------|--------|----------|-------------|---------|
| | Inadequate | R.I.* | Good | Outstanding | Unrated |
| This LA | 0% (0) | 3% (1) | 93% (28) | 0% (0) | 3% (1) |
| Comparators | 0% | 2% | 87% | 6% | 4% |
| England | 1% | 4% | 86% | 4% | 5% |

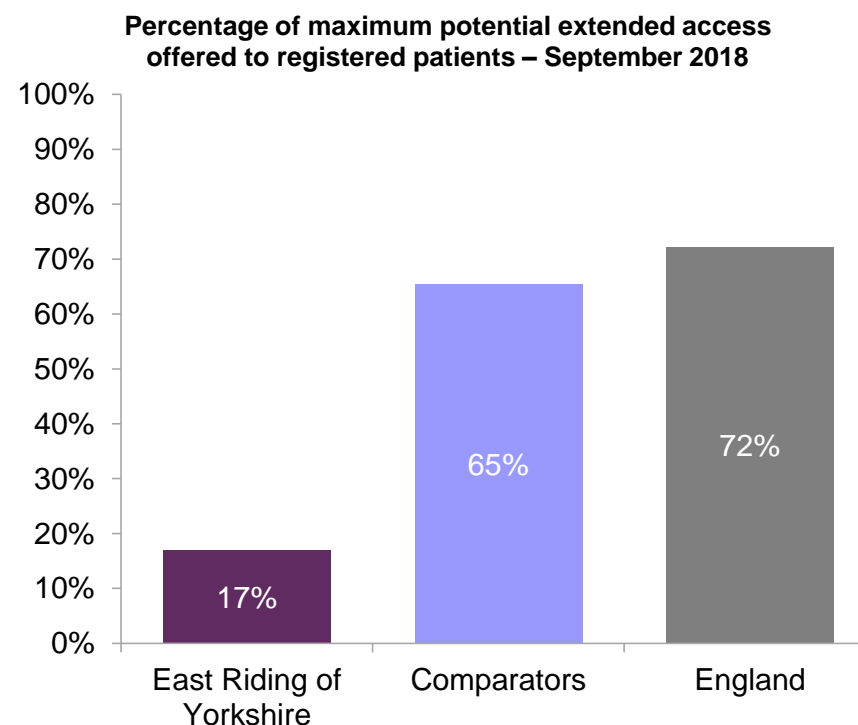

| | Provision by GP practice | | | |
|--------------------------|--------------------------|---------|------|---------|
| | Full | Partial | None | No Data |
| East Riding of Yorkshire | 0% | 45% | 48% | 6% |
| Comparators | 34% | 54% | 8% | 3% |
| England | 54% | 34% | 8% | 5% |

The table at the top left of this slide shows CQC overall ratings of GP surgeries physically located within the LA.

The chart above shows the number of registered patients for each full time equivalent GP working in surgeries located within the LA and across comparator areas at March 2019.

The table and chart on the right show the provision of extended access to GP appointments as at September 2018. NHS England set a target for CCGs to provide extended access for 100% of their population by 1 October 2018.

Main community, mental health and combined provider(s)

The following provider(s) have been identified as serving East Riding of Yorkshire based upon data on non-acute delayed transfers of care. This is a proxy measure and some providers may be missing, see technical appendix for further details. CQC data accessed 18/07/19

| Trust code | Trust name | Primary inspection category | Overall Rating |
|------------|---|---|----------------------|
| RV9 | Humber Teaching NHS Foundation Trust | Mental health - community & residential - NHS | Good |
| RCB | York Teaching Hospital NHS Foundation Trust | Acute hospital - NHS non-specialist | Requires improvement |

Community and MH core services relevant to older people

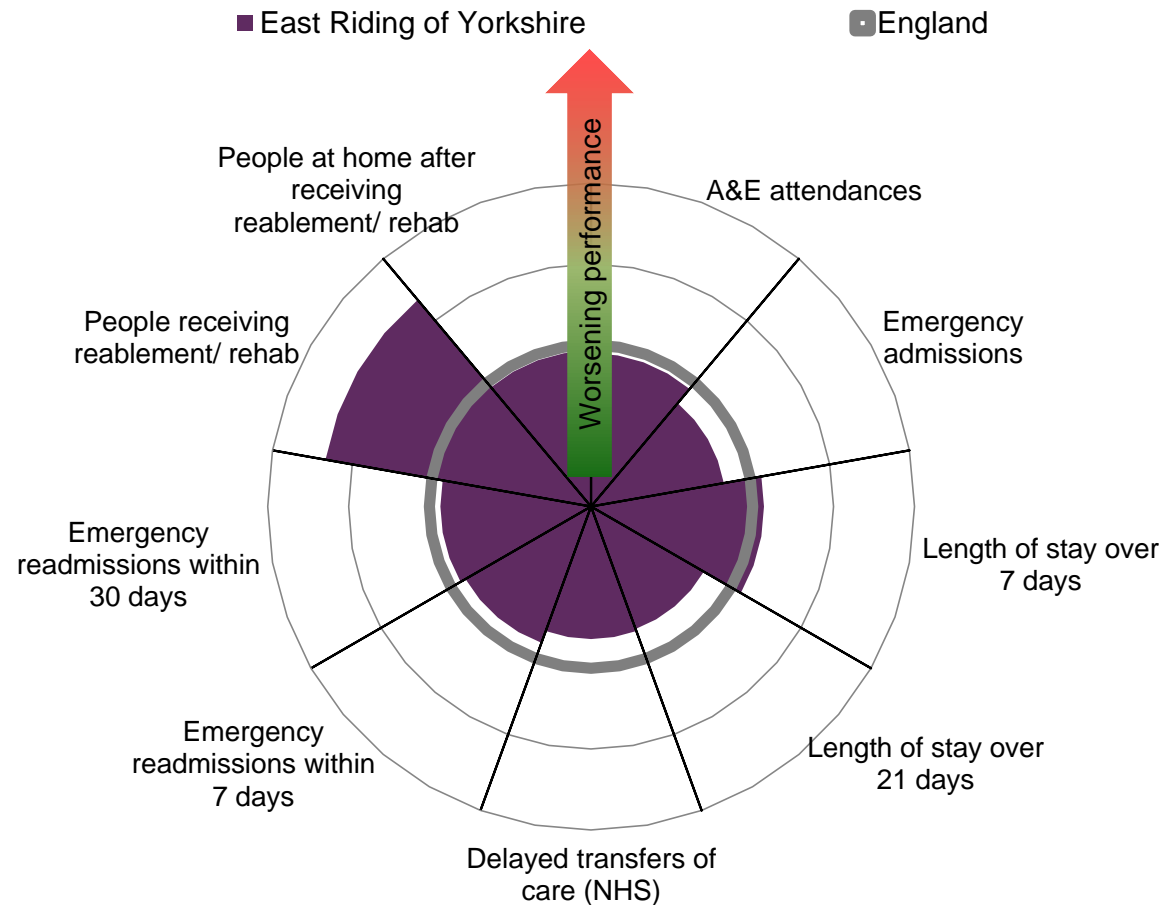

| | RV9 | RCB |
|--|----------------------|------|
| Community health inpatient services | Good | Good |
| Community health services for adults | Requires improvement | Good |
| Community health (sexual health services) | | |
| Community dental services | | |
| Community end of life care | | |
| Urgent care services | | |
| Mental health crisis services and health-based places of safety | Good | |
| Wards for older people with mental health problems | Good | |
| Community-based mental health services for older people | Good | |
| Community mental health services for people with learning disabilities or autism | | |
| Forensic inpatient/secure wards | | |

Activity – acute hospital pathway overview

Dartboard for all hospital attendees/admissions aged 65+

The shaded purple area in the dartboards represents the LA's performance relative to the average performance across England, which is denoted by the bold grey line. If the LA performance extends beyond the bold grey line then the performance of the LA is worse than the England average. Moving clockwise around the dartboards represents elements of an acute hospital pathway, through A&E attendance, to admission, discharge and readmission.

Time periods differ between indicators. Full details can be found in the technical appendix (linked in slide 2)

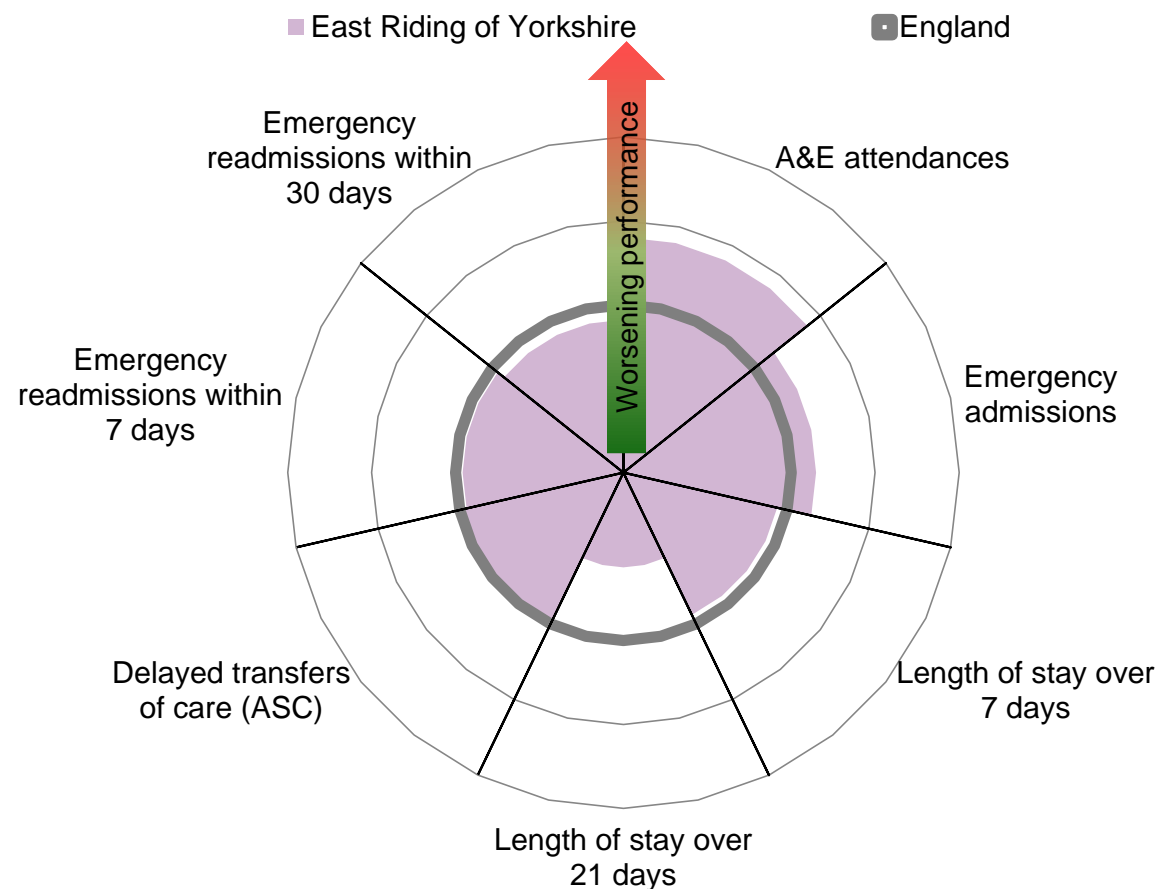

Activity – acute hospital pathway overview (from care homes)

Dartboard for hospital attendees/admissions aged 65+ coming from care homes

The shaded purple area in the dartboards represents the LA's performance relative to the average performance across England, which is denoted by the bold grey line. If the LA performance extends beyond the bold grey line then the performance of the LA is worse than the England average. Moving clockwise around the dartboards represents elements of an acute hospital pathway, through A&E attendance, to admission, discharge and readmission.

The analysis uses postcode of residence to identify activity from care homes. As such, it may include data pertaining to other addresses within the same postcode and overestimate activity from care homes.

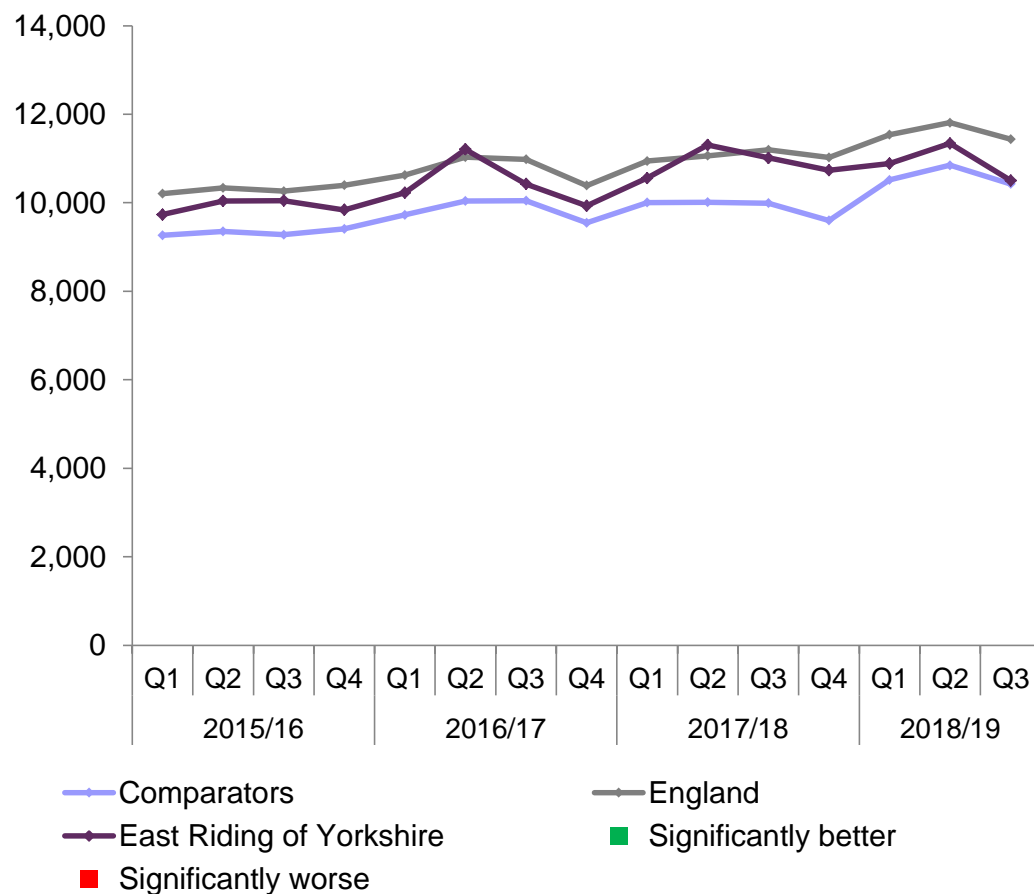

Time periods differ between indicators. Full details can be found in the technical appendix (linked in slide 2)

Activity – A&E attendances aged 65+

Rate of A&E attendances per 100,000 population aged 65+

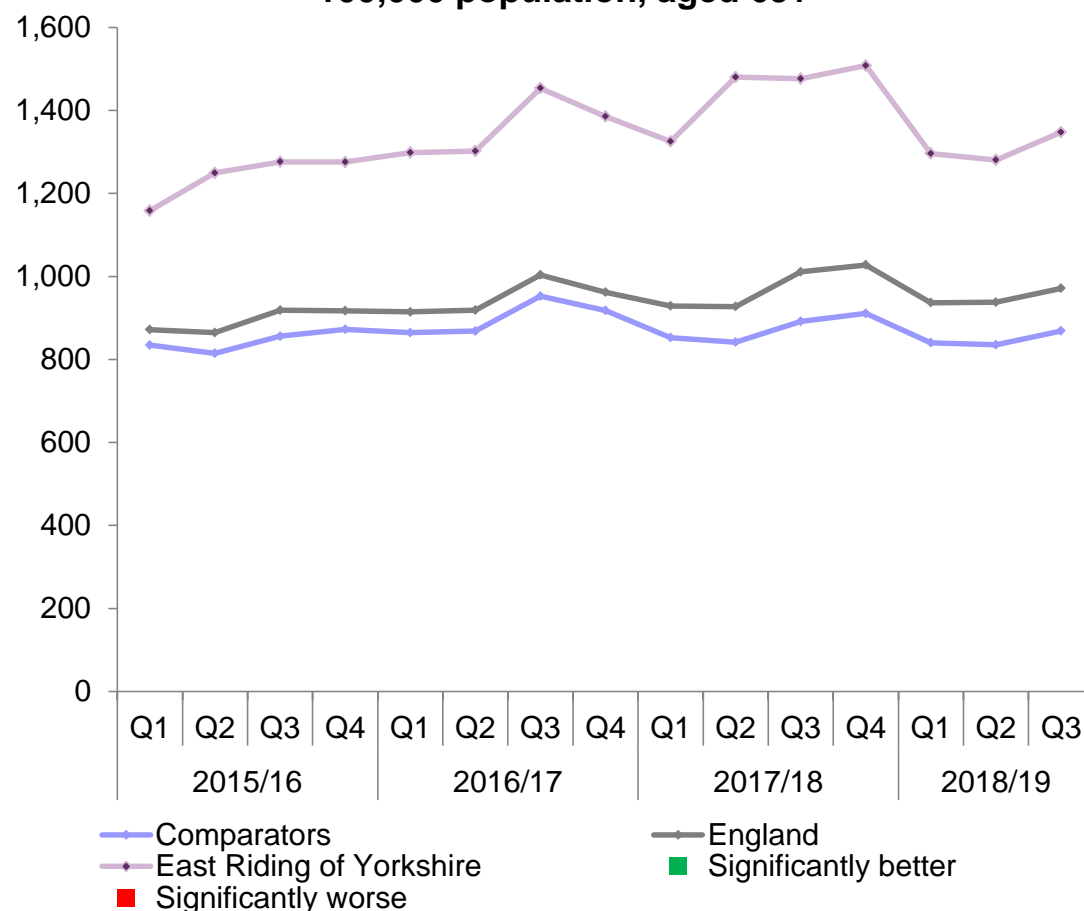

This slide shows analysis of A&E attendance rates for people aged 65+. High rates of A&E attendance may indicate problems in system working and access to primary or community care. This is based on Hospital Episodes Statistics (HES) data from April 2015 - December 2018.

| Area | Financial year quarter | | | |
|---------------------------------|------------------------|---------------|---------------|---------------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 10,737 | 10,887 | 11,342 | 10,502 |
| Comparators | 9,599 | 10,514 | 10,847 | 10,423 |
| England | 11,025 | 11,537 | 11,810 | 11,436 |

Activity – A&E attendances from care homes aged 65+

Rate of A&E attendances from care homes per 100,000 population, aged 65+

This slide shows analysis of A&E attendance rates for people aged 65+ coming from care homes. This is based on Hospital Episodes Statistics (HES) data from April 2015 - December 2018. The analysis uses postcode of residence to identify activity from care homes. As such, it may include data pertaining to other addresses within the same postcode and overestimate activity from care homes.

| Area | Financial year quarter | | | |
|---------------------------------|------------------------|--------------|--------------|--------------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 1,508 | 1,296 | 1,281 | 1,347 |
| Comparators | 911 | 840 | 835 | 869 |
| England | 1,028 | 937 | 938 | 971 |

Ratings – main acute trust(s) by admissions

| Trust code | Trust name | Rating | % of LA's admissions to trust | % of trust's admissions from LA |
|------------|--|----------------------|-------------------------------|---------------------------------|
| RWA | Hull University Teaching Hospitals NHS Trust | Requires improvement | 66% | 42% |
| RCB | York Teaching Hospital NHS Foundation Trust | Requires improvement | 23% | 16% |

The table above shows the main acute hospital trust(s) serving the LA population. Trusts are included in this list if they receive more than 10% of the LA's admissions (based on Hospital Episode Statistics (HES) activity across 2017/18).

Overall trust ratings are accurate as of 18/07/19.

The map on the left shows the main trust(s) serving different parts of the LA (based on MSOA populations) as well as the surrounding area.

The trust boundaries are not to be seen as exclusive, rather the map serves more as a guide to which acute NHS trusts people residing in different parts of the LA are likely to access. The shading of the map does not indicate any value.

Activity – A&E four hour waits

Percentage of A&E attendances seen within 4 hours

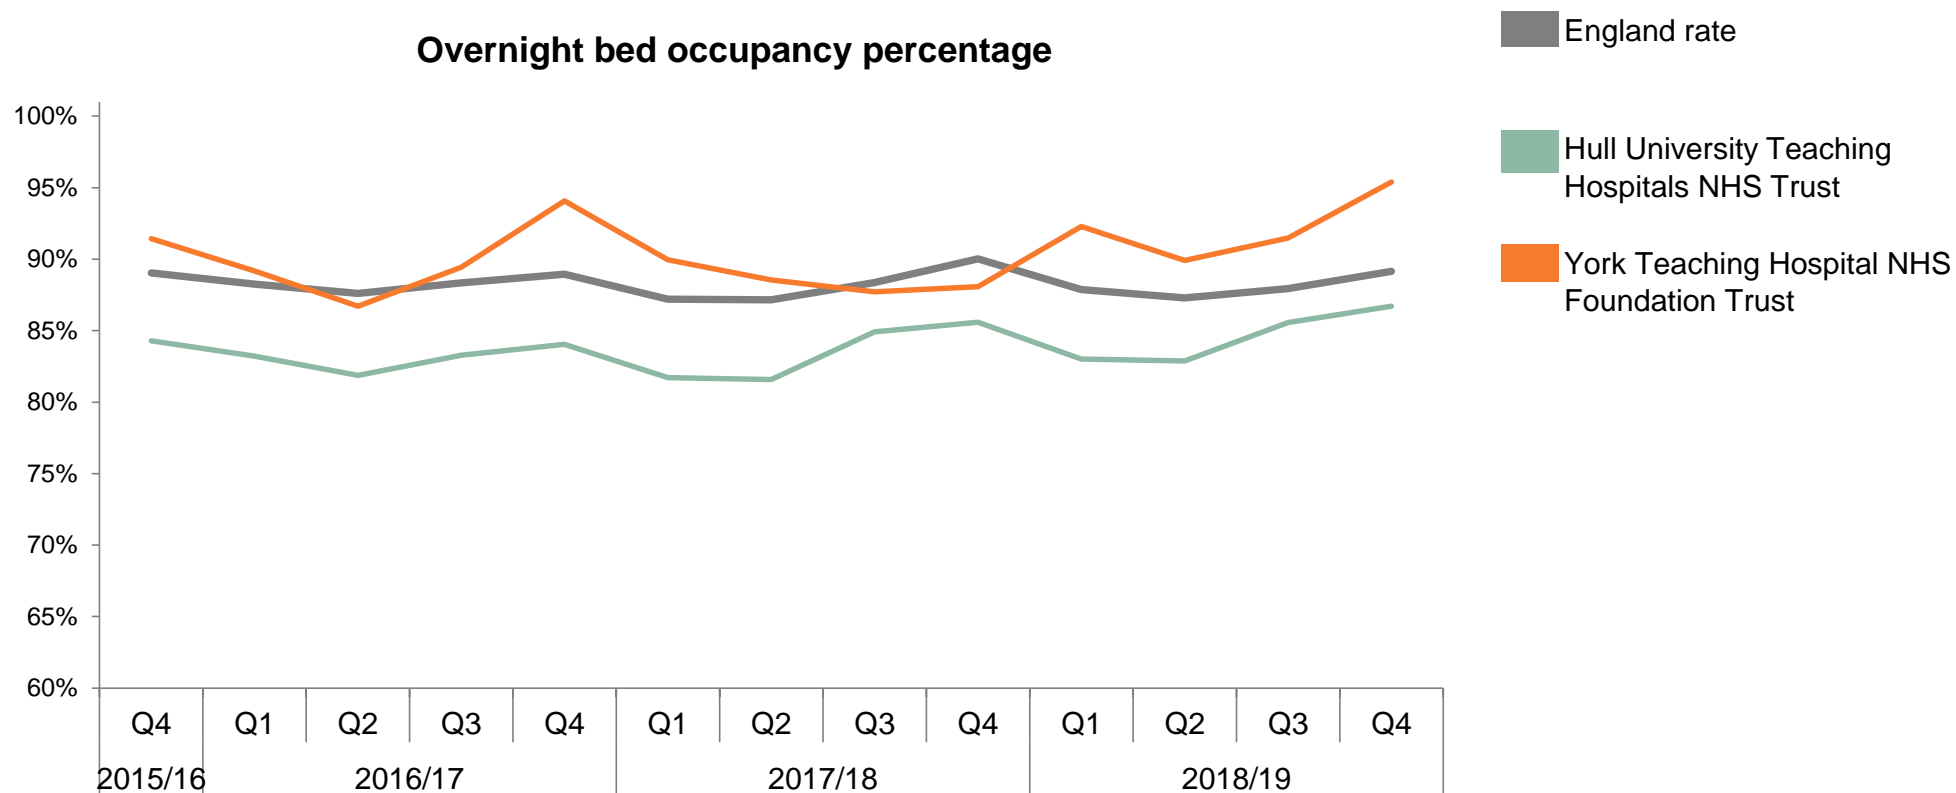

The NHS Constitution sets out that a minimum of 95% of patients attending an A&E department in England must be seen, treated and then admitted or discharged in under four hours. A&E waiting times are often used as a barometer for overall performance of the NHS and social care system. This is because A&E waiting times can be affected by changing activity and pressures in other services such as the ambulance service, primary care, community-based care and social services.

Please note that as at May 2019, fourteen NHS acute trusts have agreed to work with national bodies to test proposed new standards for urgent and emergency care and, as such, they are not returning data against the four hour standard. This will impact on the national average. Please see the technical appendix for further information.

Service provision – acute bed occupancy

Overnight bed occupancy percentage

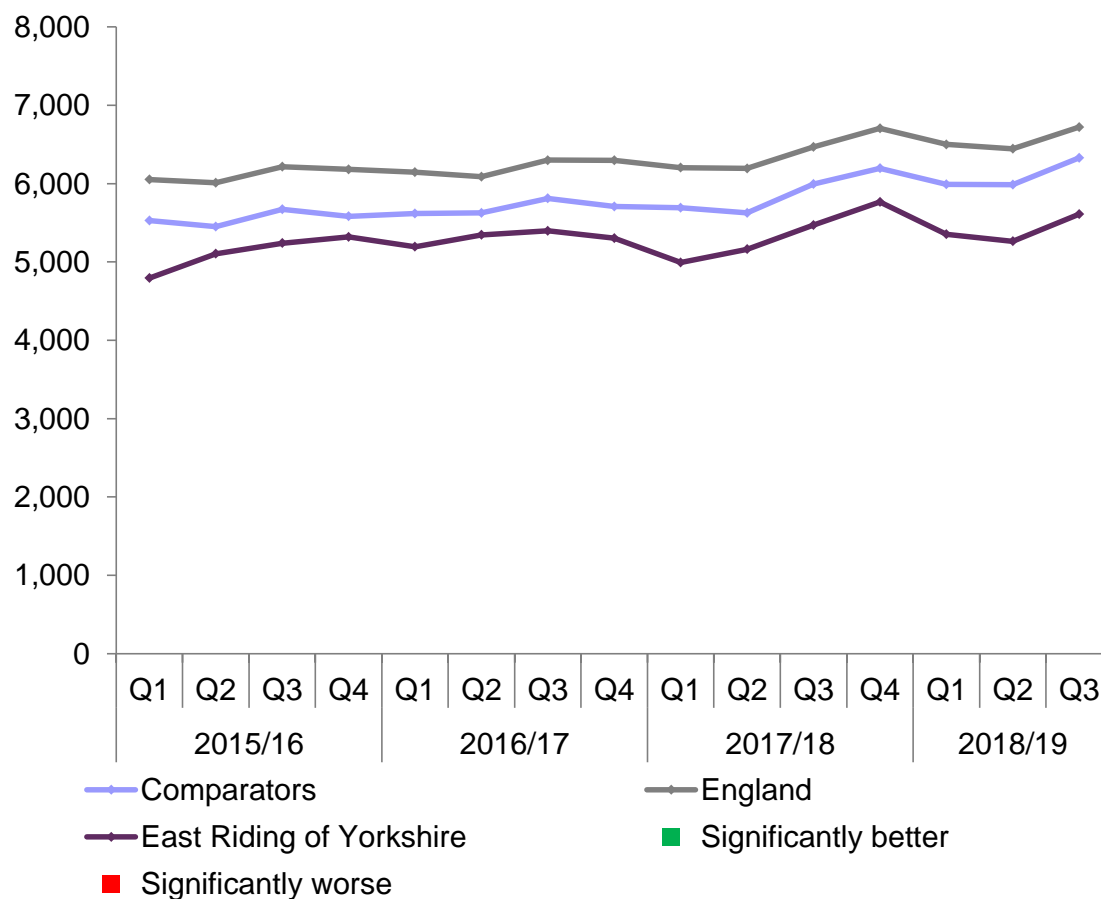

This slide shows the percentage of overnight beds that were occupied in the main trusts serving the LA in each quarter against England average figures for the quarter. Please note that England average figures for each quarter may be affected by missing data.

Although optimum occupancy rates for hospital beds may vary according to type of services offered, hospitals with average bed-occupancy levels above 85% risk facing regular bed shortages, periodic bed crises and increased numbers of health care-acquired infections.

Activity – emergency admissions aged 65+

Rate of emergency admissions per 100,000 population aged 65+

This slide shows analysis of emergency admission rates for people aged 65+. High rates of emergency admission may indicate problems with the wider health and social care system. This is based on Hospital Episodes Statistics (HES) data from April 2015 – December 2018

| Area | Financial year quarter | | | |
|--------------------------|------------------------|----------|----------|----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 5,764 | 5,354 | 5,265 | 5,612 |
| Comparators | 6,196 | 5,990 | 5,987 | 6,329 |
| England | 6,704 | 6,499 | 6,443 | 6,723 |

Activity – emergency admissions from care homes aged 65+

Rate of emergency admissions from care homes per 100,000 population aged 65+

This slide shows analysis of emergency admission rates for people aged 65+ coming from care homes. This is based on Hospital Episodes Statistics (HES) data from April 2015 – December 2018.

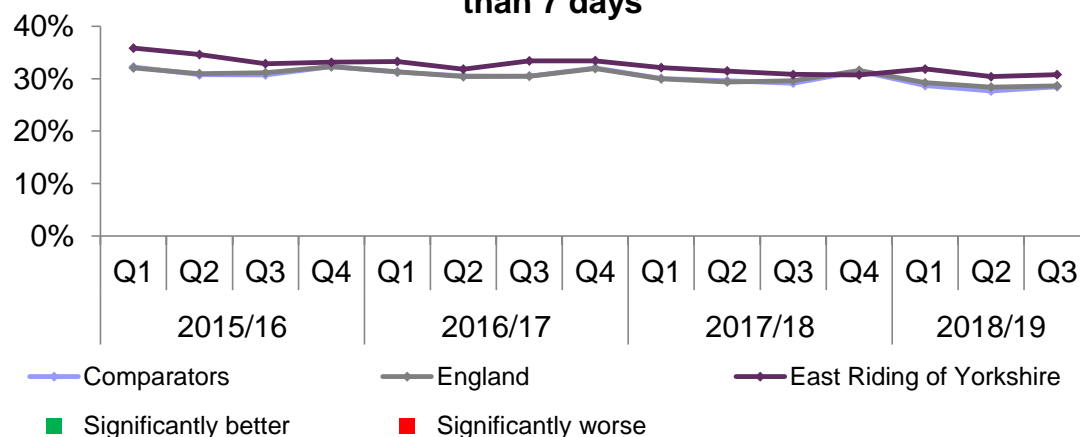

| Area | Financial year quarter | | | |
|--------------------------|------------------------|----------|----------|----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 926 | 778 | 738 | 803 |
| Comparators | 682 | 612 | 619 | 677 |
| England | 752 | 680 | 673 | 721 |

The analysis uses postcode of residence to identify activity from care homes. As such, it may include data pertaining to other addresses within the same postcode and overestimate activity from care homes.

Activity – length of hospital stay

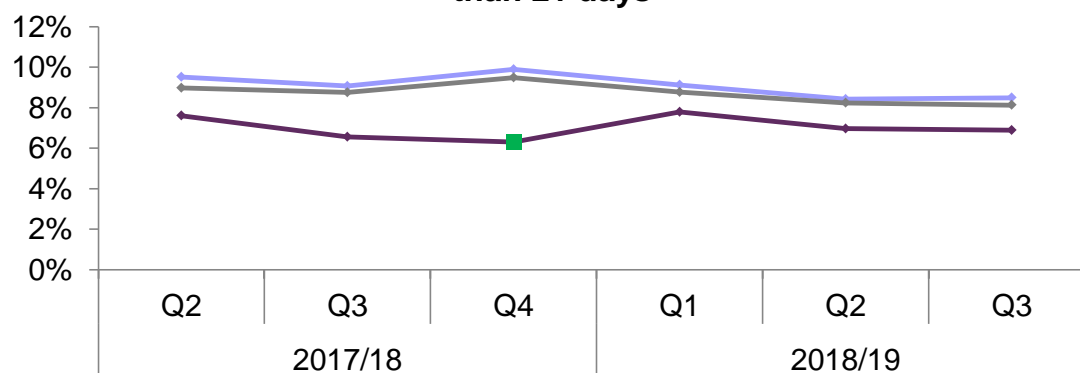

Percentage of emergency admissions that last longer than 7 days

Longer lengths of stay can act as a powerful proxy indicator of poor patient flow. CQC has looked at quarterly trends in emergency admissions for people aged 65+ that lasted longer than 7 days. This is based on Hospital Episodes Statistics (HES) data from April 2015 – December 2018.

| Area | Financial year quarter | | | |
|--------------------------|------------------------|----------|----------|----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 31% | 32% | 30% | 31% |
| Comparators | 31% | 29% | 28% | 28% |
| England | 32% | 29% | 28% | 29% |

Percentage of emergency admissions that last longer than 21 days

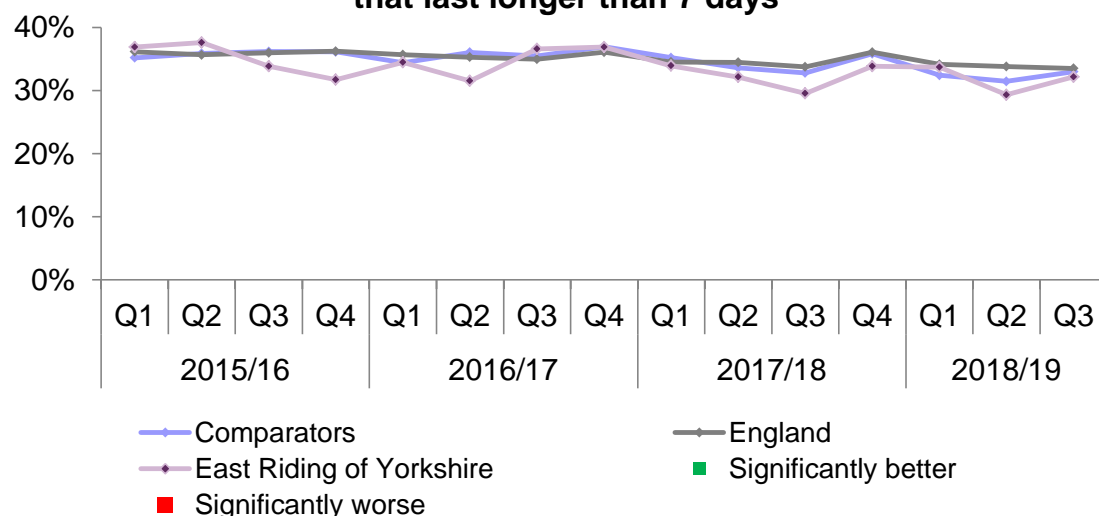

The 21 day measure is from July 2017 - December 2018. It follows a similar methodology to the measure above.

| Area | Financial year quarter | | | |
|--------------------------|------------------------|----------|----------|----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 6% | 8% | 7% | 7% |
| Comparators | 10% | 9% | 8% | 8% |
| England | 9% | 9% | 8% | 8% |

Activity – length of hospital stay - from care homes

Percentage of emergency admissions from care homes that last longer than 7 days

CQC has also analysed emergency admissions for people aged 65+ coming from care homes that lasted longer than 7 days. This is based on Hospital Episodes Statistics (HES) data from April 2015 – December 2018.

It uses the postcode of residence to identify hospital activity from care homes and so may include data pertaining to other addresses within the same postcode and overestimate activity from care homes.

| Area | Financial year quarter | | | |
|---------------------------------|------------------------|------------|------------|------------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 34% | 34% | 29% | 32% |
| Comparators | 36% | 32% | 31% | 33% |
| England | 36% | 34% | 34% | 34% |

Percentage of emergency admissions from care homes that last longer than 21 days

The 21 day measure is from July 2017 - December 2018. It follows a similar methodology to the measure above.

| Area | Financial year quarter | | | |
|---------------------------------|------------------------|-----------|-----------|-----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 6% | 7% | 5% | 5% |
| Comparators | 11% | 10% | 10% | 10% |
| England | 11% | 10% | 10% | 10% |

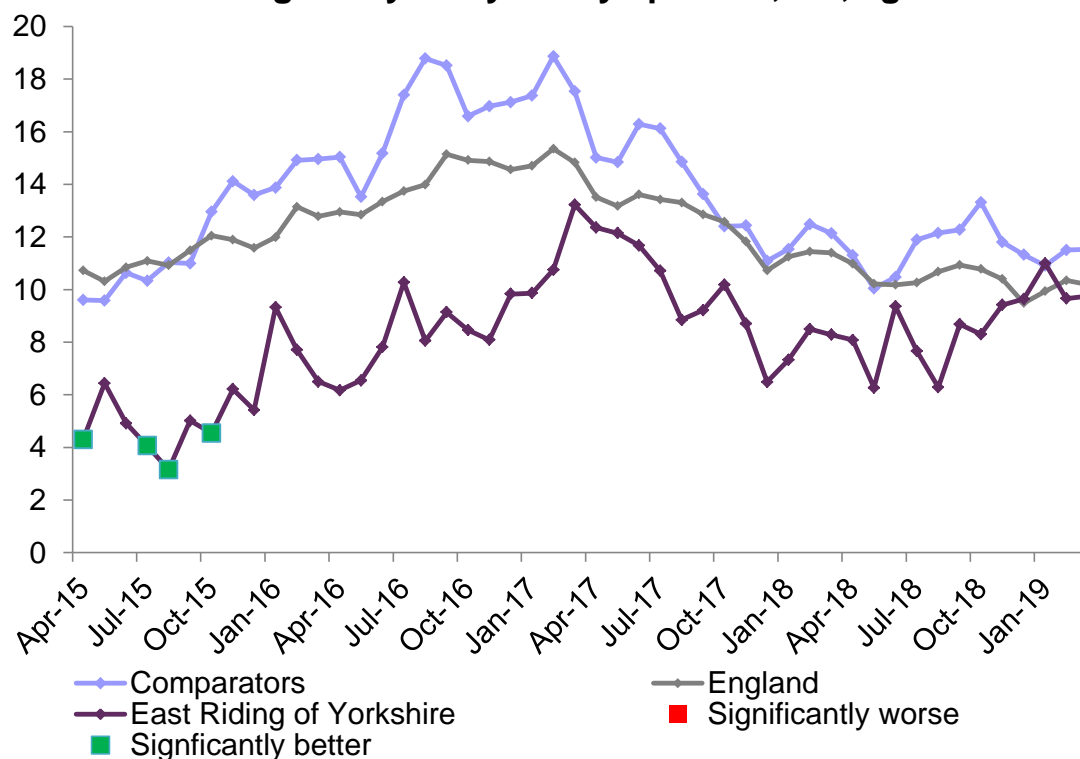

Activity – delayed transfers of care

This slide shows the daily average number of days transfers of care have been delayed as a rate per 100,000 population aged 18+ between April 2015 and March 2019. Delayed transfers of care reflect the ability of the system to ensure appropriate transfer from hospital to social care services for the entire adult population. It is an important marker of the effective joint working of local partners, and is a measure of the effectiveness of the interface between health and social care services. Analysis is based on data from NHS England.

| Area | Time period | | | | | |
|--------------------------|-------------|--------|--------|--------|--------|--------|
| | Oct-18 | Nov-18 | Dec-18 | Jan-19 | Feb-19 | Mar-19 |
| East Riding of Yorkshire | 8.3 | 9.4 | 9.6 | 11.0 | 9.7 | 9.8 |
| Comparators | 13.3 | 11.8 | 11.3 | 10.9 | 11.5 | 11.5 |
| England | 10.8 | 10.4 | 9.5 | 9.9 | 10.3 | 10.2 |

Average daily delayed days per 100,000, aged 18+

Activity – delayed transfers of care by main trust(s)

The chart shows delayed transfers of care within East Riding of Yorkshire broken down by the trusts that those delays are coming from. Trusts are included if they have contributed more than 15% of DToCs in any year. As well as acute trusts, this slide may include DToCs from MH or community healthcare providers. Please note the main trusts contributing to delayed transfers of care in an area may not be the main providers in terms of volume of activity

Activity – delayed transfers of care by responsible organisation and reason

This slide shows the rate of delayed days per 100,000 population aged 18+ over the past year (April 2018 - March 2019), broken down to show the rate of delayed days attributed to the NHS against the rate attributed to social care and those attributed to a mix of both. The slide also shows the rate of delayed days according to the reason for delay. For the purpose of our analysis, some of the reasons have been grouped.

'Further non-acute NHS care' includes community and mental health care, intermediate care, rehabilitation services etc. 'Other' includes public funding, patient or family choice, disputes and housing. The categories are self-reported categories. Different LAs show a large variation in how frequently they report in the 'Other' category. For more information see:

[DToC Guidance](#)

Activity – reablement services

This slide shows the proportion of people aged 65+ discharged from hospital into reablement services, and the proportion still at home 91 days after discharge from hospital into reablement services. These measures are taken from the Adult Social Care Outcomes Framework (ASCOF). The chart provides a more nuanced view of the two ASCOF indicators by combining them to show the proportion of people aged 65+ who received reablement following discharge from hospital (lighter shaded bars) and, of all people aged 65+ discharged from hospital, the proportion that received reablement and were still at home 91 days later (bold shaded bars). The chart therefore shows the true volume of older people who benefitted from 'successful' reablement.

Percentage of people aged 65+ discharged from hospital who receive reablement and the percentage still at home after 91 days

Percentage who received reablement

| | 2015/16 | 2016/17 | 2017/18 |
|---------------------------------|-------------|-------------|-------------|
| East Riding of Yorkshire | 1.7% | 1.5% | 1.8% |
| Comparators | 3.2% | 2.7% | 2.5% |
| England | 2.9% | 2.7% | 2.9% |

Percentage who received reablement and were still at home 91 days following discharge

| | 2015/16 | 2016/17 | 2017/18 |
|---------------------------------|--------------|--------------|--------------|
| East Riding of Yorkshire | 85.6% | 76.0% | 86.2% |
| Comparators | 86.0% | 85.1% | 85.1% |
| England | 82.7% | 82.5% | 82.9% |

Activity – emergency readmissions

Percentage of emergency readmissions within 7 days of discharge

Emergency readmissions to hospital may reflect poor discharge planning and handover of care. CQC has looked at quarterly trends in emergency readmissions for people aged 65+ within 7 days of discharge. Analysis is based on Hospital Episodes Statistics (HES) data from June 2017 – December 2018.

| Area | Financial year quarter | | | |
|--------------------------|------------------------|----------|----------|----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 8% | 7% | 7% | 6% |
| Comparators | 7% | 7% | 7% | 8% |
| England | 8% | 8% | 8% | 8% |

Percentage of emergency readmissions within 30 days of discharge

The 30 day measure covers April 2015 - December 2018. It follows a similar methodology to the measure above.

| Area | Financial year quarter | | | |
|--------------------------|------------------------|----------|----------|----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 19% | 18% | 19% | 17% |
| Comparators | 17% | 17% | 18% | 18% |
| England | 19% | 19% | 19% | 19% |

Activity – emergency readmissions from care homes

Percentage of emergency readmissions from care homes within 7 days of discharge

Percentage of emergency readmissions from care homes within 30 days of discharge

CQC has looked at quarterly trends in emergency readmissions from care homes of people aged 65+ within 7 days. Analysis is based on Hospital Episodes Statistics (HES) data from July 2017 - December 2018. It uses the postcode of residence to identify hospital activity from care homes and so may include data pertaining to other addresses within the same postcode and overestimate activity from care homes.

| Area | Financial year quarter | | | |
|---------------------------------|------------------------|-----------|------------|-----------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 10% | 5% | 10% | 6% |
| Comparators | 8% | 8% | 8% | 8% |
| England | 8% | 8% | 8% | 8% |

The 30 day measure covers April 2015 - December 2018. It follows a similar methodology to the measure above.

| Area | Financial year quarter | | | |
|---------------------------------|------------------------|------------|------------|------------|
| | Q4 17/18 | Q1 18/19 | Q2 18/19 | Q3 18/19 |
| East Riding of Yorkshire | 19% | 17% | 23% | 17% |
| Comparators | 19% | 19% | 19% | 21% |
| England | 20% | 21% | 21% | 21% |

Local Authority to Clinical Commissioning Group mapping

The table below details the percentage of the LA population that is contained within the below CCGs as at Q3 18/19. It also shows the latest overall rating from NHS England's annual assessment of CCGs and the latest quarterly quality of leadership rating from the CCG Improvement and Assessment Framework. Mergers that happened at April 2019 are noted and represented in the map but not the table.

| CCG code | CCG name | % of LA in CCG | % of CCG in LA | NHSE rating 2018/19 | Quality of leadership rating 2018/19 Q3 |
|----------|--------------------------|----------------|----------------|---------------------|---|
| 02Y | East Riding of Yorkshire | 85% | 97% | Good | Good |

The map on the left shows this LA outlined in purple with the latest post-April 2019 CCGs it covers underneath.

The CCG boundaries can be seen by the greyscale shapes which are labelled with the text in the white boxes. The shading of the CCGs on the map do not indicate any value.

Activity – NHS continuing healthcare (CHC)

Key for all charts

- England
- NHS East Riding of Yorkshire CCG

Number of new cases per 100,000 population aged 18+

Thick lines are referred people, dotted lines are eligible people

Percentage of CHC referrals completed within 28 days

Percentage of decision support tools completed in an acute setting

Funding – LA ASC costs

Average cost of an hour of homecare

This chart uses figures from the 2018 UK Homecare Association report to show the average cost of an hour of homecare within the selected LA compared to the wider region and England. Data was collected via Fol requests submitted to each council for their average cost during a week in April 2018.

The UKHCA also calculated a **minimum price of £18.01 per hour of homecare**, represented as the dotted line on the chart. UKHCA's minimum price is designed to cover the cost of an hour of homecare commissioned by local authorities, while enabling providers to meet their legal obligations (including the National Minimum Wage) and the ability to run a sustainable business. The UKHCA have also set a minimum price of £18.93 for April 2019.

The charts below are taken from the 2017/18 Adult Social Care Finance Return (ASC-FR) and relate to people aged 65+

Average weekly unit cost of residential home placement

Average weekly unit cost of nursing home placement

Progress against High Impact Changes

Implementation of the High Impact Change Model is designed to support system-wide improvements in transfers of care and is one of the four national conditions for the Better Care Fund plans for 2017-19.

The table below details the HWB's self-assessment of current and planned performance against each of the High Impact Changes for each quarter of 2018/19. The table at the bottom shows the national distribution of performance for the most recently published quarter.

| East Riding of Yorkshire | | Early discharge planning | Systems to monitor patient flow | MDT/multi-agency discharge teams | Home first/ discharge to assess | Seven-day service | Trusted assessors | Focus on choice | Enhancing health in care homes | Red Bag scheme |
|--------------------------|----------|--------------------------|---------------------------------|----------------------------------|---------------------------------|-------------------|-------------------|-----------------|--------------------------------|----------------|

Appendix – comparators

Local authority comparator areas have been drawn from the Chartered Institute of Public Finance and Accountancy's Nearest Neighbours model (data downloaded on 04/05/2017). This model identifies the 15 local authorities that are most similar to a selected LA, based on 39 variables that cover population size and density, age, gender and ethnicity make-up, deprivation, employment and housing. Local authorities are not compared to all other authorities in the country, but according to their categorisation into the following groups: London Boroughs, Metropolitan Districts and Unitary Authorities, and Counties.

The comparator group for East Riding of Yorkshire LA is made up of the following local authorities, with the LA listed as number 1 being the most similar to East Riding of Yorkshire.

- | | |
|-----------------------------|---------------------------------|
| 1 Northumberland | 9 Sefton |
| 2 Cornwall | 10 Poole |
| 3 Shropshire | 11 South Gloucestershire |
| 4 North Somerset | 12 Wirral |
| 5 Isle of Wight | 13 Stockport |
| 6 Herefordshire, County of | 14 Wiltshire |
| 7 Cheshire West and Chester | 15 Bath and North East Somerset |
| 8 Cheshire East | |

Appendix – statistical analysis

Where we can transform the data into a standard normal distribution we have generated z-scores to measure how far the observed values of the selected LA deviate from the national average or 'mean'.

The z-scores reflect the number of standard deviations from the mean, after winsorising the data at the 10% level and controlling for over-dispersion.

Where an LA's z-score is greater than 2 or less than -2 it is said to be either 'significantly better' or 'significantly worse' than the national average.

Organisations are excluded from statistical analysis if their values are too low. This is represented by "-" in the accompanying table for the indicator.
