Key findings

Overall, comparing local indicators with England averages, the health and wellbeing of children in East Riding of Yorkshire is better than England.

- The infant mortality rate is better than England but an average of 6 infants die before age 1 each year. Recently there have been 5 child deaths (1-17 year olds) each year on average.

Public health interventions can improve child health at a local level. In this area:

- The teenage pregnancy rate is better than England, with 72 girls becoming pregnant in a year.
- 14.3% of women smoke while pregnant which is worse than England.
- Breastfeeding rates in this area are similar to England. 64.5% of newborns received breast milk as their first feed. By 6 to 8 weeks after birth, 47.2% of mothers are still breastfeeding.
- The MMR immunisation level does not meet recommended coverage (95%). By age 2, 94.1% of children have had one dose.
- The number of 5 year olds with one or more decayed, missing or filled teeth is not available.
- 8.7% of children in Reception and 18.0% of children in Year 6 are obese.
- The rate of child inpatient admissions for mental health conditions at 87.4 per 100,000 is similar to England. The rate of self-harm at 303.5 per 100,000 is better than England.

The hospital admission rate for injury in children (aged 0-14) at 103.5 per 10,000 is similar to England, and for young people (aged 15-24) at 130.4 per 10,000 is similar to England.

Over a three year period 39 children were killed or seriously injured on the roads. This gives a similar rate to England.
Childhood obesity

These charts show the percentage of children who have excess weight (obese or overweight) in Reception (aged 4-5 years) and Year 6 (aged 10-11 years). They compare East Riding of Yorkshire with its statistical neighbours, and the England average. Compared with the England average, this area has a better percentage of children in Reception (20.1%) and a better percentage in Year 6 (31.7%) who have excess weight.

Note: This analysis uses the 85th and 95th centiles of the British 1990 growth reference (UK90) for BMI to classify children as overweight and obese. I indicates 95% confidence interval.

Young people and alcohol

Nationally, the rate of hospital admissions of children and young people for conditions wholly related to alcohol is decreasing. This is not the case in East Riding of Yorkshire, where there is no significant trend. The admission rate in the latest period is also similar to the England average.

Hospital admissions of children and young people for conditions wholly related to alcohol (rate per 100,000 population aged 0-17 years)

Young people’s mental health

Nationally, the rate of young people being admitted to hospital as a result of self-harm is not significantly changing, and this is also the case in East Riding of Yorkshire. The admission rate in the latest pooled period is lower than the England average*. Nationally, levels of self-harm are higher among young women than young men.

Young people aged 10 to 24 years admitted to hospital as a result of self-harm (rate per 100,000 population aged 10-24 years)

*Information about admissions in the single year 2018/19 can be found on page 4
These charts compare East Riding of Yorkshire with its statistical neighbours, and the England and regional averages.

**Child development at 2-2½ years**

Children at or above expected level of development in all five areas at 2-2½ years, 2018/19 (percentage of children reviewed)

88.8% of children aged 2-2½ years were at or above the expected level of development in all five areas of development (communication, gross motor, fine motor, problem-solving and personal-social skills) in 2018/19. This is better than the England average. A better proportion of children were at or above the expected level of development for communication skills (93.5%) and a better proportion for personal-social skills (95.9%) when compared with England (90.0% for communication and 92.9% for personal-social skills).

**Breastfeeding**

First feed breast milk, 2018/19 (percentage of newborns)

Breastfeeding rates in this area are similar to England. 64.5% of newborns received breast milk as their first feed. By 6 to 8 weeks after birth, 47.2% of mothers are still breastfeeding.

**Young people's sexual and reproductive health**

Teenage conceptions in girls aged under 18 years, 2017 (rate per 1,000 female population aged 15-17 years)

In 2017, approximately 14 girls aged under 18 conceived, for every 1,000 girls aged 15-17 years living in this area. This is lower than the regional average and lower than the England average. Chlamydia screening is recommended for all sexually active 15-24 year olds. Increasing detection rates indicate improved screening activity; it is not a measure of prevalence. In 2018, the detection rate in this area was 1,237 per 100,000 which is worse than the minimum recommended rate of at least 2,300.

**Measles, mumps and rubella (MMR) vaccination**

MMR vaccination coverage by age 2 years, 2018/19 (percentage of eligible children)

Slightly less than 95% (the minimum recommended coverage level) of children have received their first dose of MMR immunisation by the age of two in this area (94.1%). By the age of five, only 91.5% of children have received their second dose of MMR immunisation.

Note: Where data is not available or figures have been suppressed, no bar will appear in the chart for that area.

East Riding of Yorkshire - March 2020

chimat@phe.gov.uk | https://www.gov.uk/phe | https://fingertips.phe.org.uk/
The chart below shows how children’s health and wellbeing in this area compares with the rest of England. The local result for each indicator is shown as a circle, against the range of results for England shown as a grey bar. The line at the centre of the chart shows the England average.

No significant change | Not significantly different from the England average
Increasing/decreasing and getting better | Significantly better than the England average
Increasing/decreasing and getting worse | Significantly worse than the England average
Trend cannot be calculated | Significance cannot be tested

**Injuries and poisoning**

1. Infant mortality rate | Recent trend: 6 | Local no. of deaths per year*: 2 | Local age-standardised rate*: 3.9 | Eng. average rate*: 8.2 | 25th percentile: 1.0 | 75th percentile: 6.2

2. Child mortality rate (1-17 years) | | | | | | |

**Health protection**

3. MMR vaccination rate (1 dose) (2 years) | ≥95% | 95.4% | 90.3% | 74.3% | 97.1

4. DTaP/IPV/Hib vaccination rate (2 years) | ≥90% to 95% | 97.7% | 94.2% | 81.6% | 98.8

5. Children in care immunisations | 207 | 88.5% | 86.8% | 44.1% | 100.0

6. Children achieving a good level of development at the end of Reception | 2,470 | 73.8% | 71.8% | 63.1% | | 80.6

7. GCSE attainment: average Attainment 8 score | | | | | 57.5

8. GCSE attainment: average Attainment 8 score of children in care | | | 19.8% | 18.9% | 7.9% | | 31.8

9. 16-17 year olds not in education, employment or training (NEET) | 280 | 4.1% | 5.5% | 14.9% | 1.5

10. First time entrants to the youth justice system | 65 | 22.6% | 23.8% | 554.3% | 72.3

11. Children in low income families (under 18s) | 6,370 | 12.2% | 17.0% | 31.8% | 6.4

12. Family homelessness | 198 | 1.3% | 1.7% | 7.7% | 0.1

13. Children in care | 335 | 53% | 65% | 197% | 25

14. Children killed and seriously injured (KSI) on England’s roads | | | | | 4.0

**Health improvement**

15. Low birth weight of term babies | 40 | 1.6% | 2.9% | 4.6% | 1.0

16. Obese children (4-5 years) | 268 | 8.7% | 9.7% | 14.2% | | 5.4

17. Obese children (10-11 years) | 609 | 18.0% | 20.2% | 29.6% | | 10.7

18. Children with one or more decayed, missing or filled teeth | | | | | 12.9

19. Hospital admissions for dental caries (0-5 years) | | | 5 | 25.9% | 307.5% | 1,393.4%

20. Under 18s conception rate / 1,000 | 72 | 13.5 | 17.8% | 43.8 | 6.1

21. Teenage mothers | 20 | 0.8% | 0.6% | 2.3 | 0.0

22. Admission episodes for alcohol-specific conditions - Under 18s | 20 | 31.9 | 31.6% | 106.7% | 7.8

23. Hospital admissions due to substance misuse (15-24 years) | 25 | 78.3 | 83.1% | 236.8% | 32.0

24. Smoking status at time of delivery | 363 | 14.3% | 10.6% | 25.7% | | 1.6

25. Baby’s first feed breast milk | | | | | 98.7

26. Breastfeeding prevalence at 6-8 weeks after birth | 1,465 | 64.5% | 67.4% | 43.6% | | 98.7

27. A&E attendances (0-4 years) | 9,565 | 614.2% | 655.3% | 1,917.4% | | 126.3

28. Hospital admissions caused by injuries in children (0-14 years) | 540 | 103.5% | 96.1% | 184.9% | 45.1

29. Hospital admissions caused by injuries in young people (15-24 years) | 415 | 130.4% | 136.9% | 276.7% | 56.0

30. Hospital admissions for asthma (under 19 years) | 60 | 90.1% | 178.4% | 485.9% | | 50.3

31. Hospital admissions for mental health conditions | 55 | 87.4% | 88.3% | 193.9% | 22.9

32. Hospital admissions as a result of self-harm (10-24 years) | 150 | 303.5% | 444.0% | 1,072.7% | | 91.1

Notes and definitions

1. Mortality rate per 1,000 live births (aged under 1), 2016-2018: 12
2. Directly standardised rate per 100,000 children aged 1-17, 2016-2018
3. % children immunised against measles, mumps and rubella (first dose by age 2), 2018/19
4. % children completing a course of immunisation against diptheria, tetanus, polio, pertussis and Hib by age 2, 2018/19
5. % children in care with up-to-date immunisations, 2019
6. % children achieving a good level of development within Early Years Foundation Stage Profile, 2018/19
7. GCSE attainment: average attainment 8 score, 2018/19
8. GCSE attainment: average attainment 8 score of children looked after, 2018/19
9. % of 16-17 year olds not in education, employment or training (NEET) or whose activity is not known, 2018
10. Rate per 100,000 of 10-17 year olds receiving their first reprimand, warning or conviction, 2018
11. % of children aged under 16 living in families in receipt of out of work benefits or tax credits where their reported income is less than 60% median income, 2016
12. Hospital mortality rate per 1,000 households, 2017/18
13. Rate of children looked after at 31 March per 10,000 population aged under 18, 2018
14. Crude rate of children aged 0-15 who were killed or seriously injured in road traffic accidents per 100,000 population, 2016-2018
15. Percentage of live-born babies, born at term, weighing less than 2.500 grams, 2018
16. % school children in Reception year classified as obese, 2018/19
17. % school children in Year 6 classified as obese, 2018/19
18. % school children aged 5 with one or more decayed, missing or filled teeth, 2016/17
19. Crude rate per 100,000 (aged 0-5) for hospital admissions for dental caries, 2016-2017
20. Under 18s conception rate per 1,000 females aged 15-17, 2018
21. % of delivery episodes where the mother is aged less than 18, 2018/19
22. Hospital admissions for alcohol-specific conditions – under 18, crude rate per 100,000 population, 2016/17-2018/19
23. Directly standardised rate per 100,000 (aged 15-24) for hospital admissions for substance misuse, 2016/17-2018/19
24. % of mothers smoking at time of delivery, 2018/19
25. % of newborns who receive breast milk as first feed, 2018/19
26. % of mothers breastfeeding at 6-8 weeks, 2018/19
27. Crude rate per 1,000 (aged 0-4) of A&E attendances, 2018/19
28. Crude rate per 10,000 (aged 0-4) for emergency hospital admissions following injury, 2018/19
29. Crude rate per 10,000 (aged 15-24) for emergency hospital admissions following injury, 2018/19
30. Crude rate per 10,000 (aged 0-16) for emergency hospital admissions for asthma, 2018/19
31. Crude rate per 100,000 (aged 0-17) for hospital admissions for mental health, 2019/20
32. Directly standardised rate per 100,000 (aged 10-24) for hospital admissions for self-harm, 2018/19

*Numbers in italics are calculated by dividing the total number for the three year period by three to give an average figure. Where data is not available or figures have been suppressed, this is indicated by a dash in the appropriate box.
